

Services

FUTURE-ORIENTED INVOLVEMENT

We have continually extended our range of tasks, which currently include the following:

>> *Content and administrative consulting in the run-up to R&D projects*

We provide support in finding suitable funding sources, in application writing, budget calculation, and in entering cooperation contracts and non-disclosure agreements.

>> *Financial and administrative support for R&D projects*

We help you stay in control of the finances of ongoing projects and carry out all financial and administrative activities towards the project sponsor or industrial partner.

>> *Consulting on application and patenting*

We advise you on the patentability of developments and inventions and provide support for reviewing a patent agent or licensing agency. At the same time, the University will consider whether it is interested in marketing the patent.

Please use your campus login data to download the forms available on our website.
